

# How to Activate SMART Notebook software 10.0

Find your serial number on the lower right hand bezel of your SMART Board (SBXXX-RX-XXXXXX)

Enter this serial number and additional information at <http://smarttech.com/nb10productkey/>  
SMART will send you a product key via e-mail that will activate your software.

You only have to enter the serial number of one SMART product whether you require single or multiple installations of Notebook software 10.

Once you have the product key open SMART Notebook software on the computer that you want to activate the software on. From the Welcome Screen select Help/Support and then click on Activate Software. It will prompt you to enter your product key.
